

A Weller Warranty Wins Every Time.

Many multi-year and extended warranties are not worth the paper they're printed on. For starters, most failures will present themselves almost immediately and certainly within the first year. That means that a multi-year warranty or an expensive extended warranty will either never be used or it may be denied in years two and three. Worse, it may take months or more to process your claim at the competition. Weller resolves over 55% of warranty claims over the phone or live chat with our dedicated team of professionals. We won't make you wait weeks or months to process a warranty and we won't just throw parts at problems. The Weller Way is our guarantee that when you buy quality and integrity, you don't need a gimmicky warranty. **Don't Buy the Paper. Buy the Performance. Weller Reman.**

With Weller, you are guaranteed fair and prompt service when you have a problem, not the run-around when you need us most. **Our promise to you is backed by our best-in-class warranty.**

When you Choose Weller, You Stop Playing the Warranty Game.

Would you select a lower-quality product with a gimmicky warranty over a high-quality Weller product? Here are some important questions to consider as you choose a partner. Your uptime depends on it.
